## Twitter 101 (For desktop)

Sign up at <a href="https://twitter.com/">https://twitter.com/</a>

Create your account with your *twitter handle* **twitter handle** = your username e.g. @CSHPBCBranch

**Follow** people such as @CSHPBCBranch **Follow** = subscribe to their tweets

*Tweet* = 140-character message posted on Twitter

How to tweet:

- 1) Click on Compose
- 2) Type your message.
- 3) Click Tweet.

Things to include in your tweet:

- 1) Your message (you only have 140 characters, and it includes mention and hashtag)
- 2) *Mention* e.g. @CSHPBCBranch
- 3) #Hashtag

**#hashtag** = a keyword, can be indexed for searching e.g. #rxcares, #PAM2015

**Retweet (RT)**= forwarding another user's tweets

Ensure your tweets are **not "protected"** or else CSHP-BC will not be able to retweet your tweets.

Go into **settings** (click on cogwheel icon). Go to "**security and privacy**" and ensure "protect my tweets" is **NOT** selected

You can search for tweets using hashtags (e.g. #clinicalrx) or twitter handle (e.g. @CSHPBCBranch)
